

## 中大香港亞太研究所民調： 近八成市民不同程度擔心感染新冠肺炎 九成半人支持抵港者隔離 14 日

新型冠狀病毒肺炎（新冠肺炎）最近在全球蔓延，香港中文大學（中大）香港亞太研究所於 2020 年 3 月 19 日至 23 日晚上<sup>1</sup>，就此展開電話調查，詢問市民相關意見，結果發現，近八成市民在不同程度上擔心自己會感染到這個疾病。在防疫措施上，九成半人支持或非常支持現時所有從外地抵港人士，均需要接受 14 日強制檢疫和醫學監測。

調查結果顯示，78.8%的受訪者在不同程度上擔心自己會感染到新冠肺炎，其中 45.2%感到有點擔心，20.1%表示頗為擔心，13.5%更表示非常擔心，只有 20.5%的受訪者表示不擔心（見附表一）。67.0%的受訪者認為，和上月（二月）相比，現時（三月）的疫情惡化了，感到疫情緩和了的只佔 8.1%，23.0%則認為和二月時差不多（見附表二）。

調查亦發現，九成半（95.1%）受訪者支持或非常支持現時所有從外地抵港人士，均需要接受 14 日強制檢疫和醫學監測（見附表三）；亦有 96.0%受訪者贊成或非常贊成加重對不誠實填報健康申報表或違反強制隔離措施人士的刑罰（見附表四）。

此外，71.5%受訪者認為，政府在應對疫情的措施上做得不足夠或非常不足夠，表示足夠或非常足夠的只有 23.6%（見附表五）。對於政府在控制這次疫情上的表現，60.5%受訪者認為頗為不好或非常不好，25.5%則覺得頗好或非常好（見附表六）。

<sup>1</sup> 這項調查在3月27日政府宣佈禁止多於4人於公眾地方聚集等措施前進行，故未能反映該等新措施的影響。

在個人的防疫措施方面，95.4%的受訪者表示，經常在外出時帶口罩，85.9%經常用梘液或酒精搓手液洗手，61.2%經常用消毒物品清潔家居（見附表七）。和上月（二月）比較，53.5%受訪者表示減少了出外用餐，38.0%則說情況差不多，只有 8.1%表示多了。在與親戚朋友聚會方面，61.6%受訪者表示較二月少了，35.3%回答差不多，只有 2.7%表示多了。同樣地，在逛街購物方面，59.7%受訪者表示較二月少了，34.9%表示差不多，只有 4.8%回答多了。在郊遊行山方面，52.3%受訪者表示和二月時差不多，33.4%表示少了，13.5%則多了（見附表八）。

當受訪者被問到，跟上月（二月）相比，自己在防疫態度上是鬆懈了、嚴謹了，還是差不多時，78.8%表示差不多，15.4%認為自己嚴謹了，只有 5.6%覺得自己鬆懈了。不過，當被問到香港一般市民的防疫態度時，44.6%受訪者認為較上月（二月）鬆懈了，39.4%表示差不多，只有 13.9%覺得嚴謹了（見附表九）。

最後，調查亦發現，63.5%受訪者表示家中儲備的口罩足夠或非常足夠，32.6%則認為不足夠或非常不足夠；79.6%受訪者表示，家中儲備的消毒清潔用品足夠或非常足夠，18.9%認為不足夠或非常不足夠（見附表十）。

是次調查成功訪問了 518 位 18 歲或以上的市民，回應率為 39.8%，百分比變項的抽樣誤差約在正或負 4.30 個百分點以內（可信度設於 95%）。

## **Survey Findings on Views about COVID-19**

### **Released by Hong Kong Institute of Asia-Pacific Studies at CUHK**

As the Coronavirus Disease 2019 (COVID-19) spread around the world recently, the Hong Kong Institute of Asia-Pacific Studies of The Chinese University of Hong Kong (CUHK) conducted a telephone survey from 19 to 23 March 2020<sup>1</sup> asking the public their views on related matters. The survey results found that nearly 80% of the citizen were worried to varying degrees that they would be infected with the disease. Regarding the policies against the epidemic, 95.1% of the respondents supported or strongly supported that all people entering Hong Kong needed to undergo the 14-day compulsory quarantine and medical surveillance measures.

The survey results showed that 78.8% of the respondents were worried to varying degrees that they would be infected with COVID-19, of which 45.2% were somewhat worried, 20.1% were quite worried, and 13.5% were very worried. Only 20.5% of the respondents were not worried at all. According to 67.0% of the respondents, the current (March) outbreak had worsened in comparison to that of the previous month (February), with only 8.1% feeling that the outbreak had eased and 23.0% believing that it was about the same.

The survey also found that 95.1% of the respondents supported or strongly supported that all people entering Hong Kong had to undergo the 14-day compulsory quarantine and medical surveillance measures; 96.0% of the respondents agreed or strongly agreed to increase the penalties for those who dishonestly filed health declaration forms or violated compulsory quarantine measures.

Besides, 71.5% of the respondents thought that the government's measures in response to the epidemic were insufficient or very insufficient, and only 23.6% said that it was sufficient or very sufficient. Regarding the government's performance in monitoring the epidemic, 60.5% of the respondents thought it was quite bad or very bad, and 25.5% thought it was quite good or very good.

Concerning those measures taken by individuals to prevent infection, 95.4% of the respondents said that they often wore masks when going out, 85.9% often washed their hands

<sup>1</sup> The survey was carried out before the government's announcement of new measures on 27 March that prohibits group gatherings of more than 4 people in public places. Therefore, it cannot reflect the impacts of these measures.

with liquid soap or hand sanitisers, and 61.2% often cleaned their homes with disinfectants. Compared with the situation of last month (February), 53.5% of the respondents said that they dined out less, 38.0% said they dined out almost the same, and only 8.1% said they dined out more. With regard to gathering with relatives and friends, 61.6% of the respondents said that they had fewer gatherings compared to February, 35.3% responded that it was about the same, and only 2.7% said they had more gatherings. Similarly, regarding shopping, 59.7% of the respondents said they went out less for shopping, 34.9% said there was no difference from last month, and only 4.8% answered that they did more shopping. With respect to the frequency of hiking, 52.3% of the respondents stated that it was about the same, 33.4% said they went out less for hiking, and 13.5% answered that they hiked more often.

When the respondents were asked whether they were less alert, more alert or about the same to epidemic prevention in comparison with the previous month (February), 78.8% said they were about the same, 15.4% thought they were more alert, and only 5.6% felt that they were less alert. However, when they were asked about the general public's attitudes towards epidemic prevention in Hong Kong, 44.6% of the respondents thought that people were less alert compared with last month (February), 39.4% said they were about the same, and only 13.9% thought that they were more alert.

Lastly, the survey also found that 63.5% of the respondents said that the number of masks stored in their home was sufficient or very sufficient, and 32.6% considered the amount was insufficient or very insufficient. 79.6% of the respondents said that the amount of disinfection and cleaning supplies stored in their home to be sufficient or very sufficient. 18.9% considered the amount stored to be either insufficient or very insufficient.

In this survey, a total of 518 respondents aged 18 or above were successfully interviewed, with a response rate of 39.8%. The sampling error is estimated at plus or minus 4.30 percentage points at the 95% confidence level.
